Profile

Product-oriented engineer with 9+ years shipping user-facing software end-to-end.

Strongest in frontend (React, TypeScript, Next.js, TanStack, Tailwind) with a fullstack background spanning Node and mobile (React Native).

Professional Experience

Senior Frontend Engineer, Qonto

Oct 2023 - Ongoing
Remote

- Designed and built an AI-driven internal security operations platform: autonomous Claude SDK agents ingested alerts from cloud, threat-detection and monitoring systems, then triaged them end-to-end, enriching context, classifying severity, opening incidents, paging on-call, and posting to Slack.
- Owned end-to-end onboarding-funnel improvements that move users from signup to paying customer, shipping experiments across flows.
- Shipped the frontend transition for KYC process from the onboarding flow to an in-app experience, reducing user drop-off and increasing conversions by allowing users to explore the app before completing verification.

Senior Frontend Engineer (Contract), Personio

May 2023 - Oct 2023
Remote

- Drove the migration to React of the document management system, achieving an 80% reduction in load times and a 50% decrease in clicks for key actions and filtering, significantly enhancing the user experience.
- Contributed to the transition from a monolithic PHP backend to micro-frontends with Next.js by establishing best practices, which reduced technical debt and improved the developer experience.

Founding Frontend Engineer, Grafbase

Dec 2021 - May 2023
Remote

- First frontend hire. Took a developer-focused GraphQL platform from zero to first paying customer, owning the full UX stack - Next.js, TypeScript, URQL, Clerk, Radix.

Senior Frontend Engineer, Zartis

Aug 2020 - Dec 2021
Remote

- Led frontend for a regulated e-signature product, architecting the codebase from scratch.
- Scaled the project from a repository to a monorepo utilizing modern technologies like TypeScript, Gatsby, Preact, Redux, Tailwind, Storybook, Jest, and Cypress, enhancing code modularity and collaboration.

Fullstack Engineer, Factor Energia

Sep 2019 – Aug 2020
Barcelona, Spain

- Upgraded a legacy internal web application from PHP 5.4 to a modern PHP 7.4 (Yii2), improving system security, stability, and performance.
- Developed and maintained the company's call-center software using PHP, Yii2, jQuery, Bootstrap, and SQL, enhancing operational efficiency.

Fullstack & Mobile Engineer, TACTiC

Oct 2016 – Sep 2019
Batea, Spain

- Designed, built, and scaled multiple in-house web applications using PHP, Yii2, JavaScript, and MySQL.
- Developed a mobile version of proprietary software for wineries (iOS and Android) using React Native and Redux, enabling the client to expand their platform's reach and improve customer engagement through mobile accessibility.

Frontend Engineer (Internship), Solinum FI

May 2016 – Oct 2016
Rovaniemi, Finland

- Migrated a legacy internal application from jQuery to React, significantly improving performance, maintainability, and UX, while ensuring smoother workflows for the company's internal tooling.

Education

**Bachelor's in Software Engineering,
Universitat Oberta de Catalunya**

2020 – Jan 2023
Remote

Degree in Mobile & Web Development

2012 – 2016
Tarragona, Spain
